

Overview

The Welding and Fabrication Pathway at Princeton Jr./Sr. High School gives students the opportunity to learn through applicable hands on training.

The pathway will teach students the basics of welding and fabrication, as well as expose them to the many diverse and profitable careers in fabrication. Additionally, students will have the opportunity to earn industry certifications and college credit through articulation with Butte College.

Manufacturing Career Technical Education (CTE) Pathway Classes:

1. Ag. Shop 1

(CTE Introductory)

2. Ag. Shop 2

(CTE Concentrator)

3. Ag. Shop 3**

(CTE Completer)

4. Ag. Mechanics**

(CTE Completer)

****Option: a student can complete the CTE pathway with either Ag. Shop 3 or Ag. Mechanics as the completer course of instruction.**

Welding and Fabrication Pathway

Princeton Jr./Sr. High School

Why choose Welding and Fabrication?

Long-Term Benefits:

Careers in welding and fabrication are in very high demand around the world. With industries like mechanical agriculture and natural resource extraction expanding rapidly, highly skilled welders, fabricators, and technicians have never been in higher demand. Consequentially, starting salaries for employees in these fields often reaches six figures.

Short-Term Benefits:

The Welding and Fabrication Pathway allows students to apply their science and mathematics knowledge to hands-on, real-world projects.

Why choose Princeton?

We are a K-12 district with a K-6 elementary and a 7-12 junior / senior high. Both our sites offer safe and supportive small school environments, academically rigorous curriculum taught by dedicated teachers, and numerous opportunities for involvement. Among the reasons you should consider making Princeton your home:

Great learning environment: We average about 15 students per class; our excellent student-to-staff ratio allows our faculty and staff to know our students well and affords the opportunity to provide greater individualized attention. We have very few discipline problems and remain largely untouched by the gang problems that many surrounding communities are facing.

Strong and improving performance: Both of our schools have made great strides in academic achievement as measured by the Academic Performance Index (API). Princeton Elementary 2012-13 score of 819 was fifth best among Glenn and Colusa County elementary schools. Princeton Junior Senior High's 2012-13 score of 800 was best among Glenn and Colusa County high schools.

Opportunities for involvement: In Princeton there are numerous ways for students, parents, community members, and staff to be involved. Sports (football, volleyball, basketball, baseball, and softball), 4-H, FFA, yearbook, CSF, and MECHA are a few of the many opportunities we offer.
